

Dear Colleague,

Thank you very much for your interest in a membership of **infosyon e. V.**

With this letter we would like to give you some information and a short overview of what our forum offers.

The forum was founded in July 2004 in Kassel as a non-profit association.

Within this forum all people should come together who work with the method of system constellations in organisations and in professional contexts.

Infosyon e. V. offers our members a convincing initiative and lively community of consultants, supervisors, coaches, constellation facilitators and trainers. You will be joining a forum which develops and encourages the method of system constellations, their use and value in organisations and professional contexts as well as their profile, recognition, research and professionalism.

We warmly welcome you to actively shape and participate in our forum.

The advantages of a membership are:

- Networking internally and externally

People who work with system constellations within organisations and professional contexts may use **infosyon e. V.** as a networking platform.

We offer help to providers of system constellations to develop their professional identity through communication platforms which are beneficial for enlightening and resolving discussions between all parties.

The forum collaborates with other international communities.

- Market

We would like to offer the members of our forum also a platform for customer contact.

Interested members are kept informed of the „State of the Art“ developments of constellation work. Users of system constellations are offered detailed information on the possibilities of the implementation of constellations in organisations and professional contexts.

To ensure necessary quality we have developed professional standards and list certified training institutions.

We nurture the dialogue between constellation work and other consultancy methods.

Users are supported in their search for an adequate consultant using comparable profiles of constellation facilitators.

Information on the application of system constellations in organisations and professional contexts will be provided on the website.

- PR and Marketing

Our members are informed of the latest developments by our Newsletter.

We emphasise liaison with the media and take position in current opinion formation processes, all of which our members profit from.

We want to develop the public recognition of constellation work as a recognised consultation tool.

By cooperating, collaborating and organising congresses and various events, we strive to increase awareness of the method of system constellations and its developments.

- Research, Knowledge and Experience transfer

We encourage the transfer of knowledge and experience at our yearly General Assembly, which is held in combination with our conference. Within the yearly meetings of our research group, we support research and utilize the potential of constellation work. The results and findings are continuously made available to our members.

Together with the University Witten-Herdecke, we are creating a research network and knowledge data base. This enables us the access to academic discourse.

We organise conferences and workshops to encourage personal meetings, locally and nationwide also for professional exchange between constellation facilitators, consultants and users.

The General Conditions for a Membership

The Articles of Association covers all important procedures of the Forum. You receive the General Conditions with this registration.

To become a member

To become a member of infosyon please send the registration form (see below) filled out to our office. The board decides on the application.

The membership

Membership costs 150,00 € per year. In addition there is a one-time Registration fee of 50,00 €.

If you apply for membership after 30.June of a calendar year you will only be charged half the membership fee for that year. The amount for the current year is to be paid by 31January, respectively within 14 days after confirmation of membership.

We are pleased if you approve a direct debit as this simplifies our administration process enormously. Otherwise please transfer the membership fee onto our account below:
